EDUCATION

Dr. A. P. J. Abdul Kalam Technical University
B.Tech in Computer Science and Engineering | CGPA: 8.06

Aug 2024 – Present
Ghaziabad, Uttar Pradesh

EXPERIENCE

Software Incubator – Software Development Center

Flutter & Android Developer Intern

Mar 2026 – Present
Ghaziabad, Uttar Pradesh

- Engineered and shipped **Presently** – a college attendance tracker – end-to-end within a **45-member** cross-functional team, implementing **predictive analytics**, **offline-first** architecture via **Room**, and automated **WorkManager** reminders using **Kotlin**, **Jetpack Compose**, and **MVVM**.
- Owned the full **CI/CD** release pipeline for **Presently** on the **Google Play Store** – including **build signing**, **versioning**, **Flutter flavours**, **ProGuard** configuration, and **staged rollouts** – reducing deployment time and eliminating manual release errors.
- Diagnosed and resolved **production bugs** across the codebase through systematic **crash log analysis** and **regression testing**, improving **app stability** and maintaining **sprint velocity** within an **Agile/Scrum** workflow.

Programming Club – AKGEC

Flutter Developer & Competitive Programmer

Sep 2025 – Present
Ghaziabad, Uttar Pradesh

- Architected an **event registration system** in **Flutter** with **GoRouter** navigation and **Riverpod** state management, handling **1,200+** signups with **scalable REST API** backend integration; mentored **50+** junior developers in **Flutter development** and **clean code** principles.
- Solved **300+** **DSA** problems on **LeetCode** and **Codeforces** covering **arrays**, **graphs**, **dynamic programming**, and **trees**; facilitated **technical workshops** on **competitive programming** and **problem-solving strategies** for club members.

PROJECTS

BunkBite 📱 | *Flutter, Dart, BLoC, Dio, GoRouter, FCM, Node.js, PostgreSQL*

Feb 2026

- Published on **Google Play Store** for **200+** students using **Flutter & Dart**; supports live menu browsing, order customisation, and secure payments via **REST APIs** with **cross-platform** compatibility.
- Implemented real-time **order status updates** with **FCM push notifications** and **WebSocket** for low-latency communication between kitchen and user.
- Structured the app with **BLoC** state management, **GoRouter** navigation, and **Dio** HTTP client; wrote **widget tests** and **unit tests** achieving **80%+** test coverage, ensuring a scalable and maintainable codebase.

TruXpense 📱 | *Kotlin, Jetpack Compose, MVVM, Clean Architecture, Hilt DI, Room, Retrofit, Spring Boot, BERT*

Jan 2026

- Built an **AI-powered expense tracker** with automatic **SMS parsing** across **15+** Indian banks and **UPI deep-link integration** with GPay, PhonePe, and Paytm – zero manual entry.
- Fine-tuned a **server-side BERT** model with **on-device MLKit** for merchant name extraction; **ML category classifier** achieves **92% accuracy**, reducing mis-categorisation by **40%** over rule-based baseline.
- Secured **Spring Boot REST APIs** with **JWT** and **OAuth 2.0**; added multi-format export (**PDF** and **Excel**), **WorkManager**-driven budget alerts, and **performance optimisation** cutting average API response time by **35%**.

SpaceHub 📱 | *Kotlin, XML, MVVM, Room, WebRTC, WebSocket, Spring Boot, PostgreSQL, JWT*

Nov 2025

- Architected **20+** screens as sole mobile developer in a **6-member** team using **MVVM** and **role-based access control** across **3 permission tiers** for **200+** users.
- Engineered **WebSocket** real-time messaging and **WebRTC** voice chat supporting **8-person audio rooms** with measurably high uptime.
- Achieved **85% offline functionality** via **Room caching** and secured the backend with **JWT-based authentication**.

SKILLS

Languages: Dart, Kotlin, Java, JavaScript, C, C++

Mobile – Flutter: Flutter, BLoC, Riverpod, Provider, Dio, GoRouter, Flutter Flavours, FCM, dart:isolates, Material Design

Mobile – Android: Jetpack Compose, MVVM, Clean Architecture, Hilt DI, Room, WorkManager, DataStore, Retrofit, Coroutines, StateFlow, Navigation Component, JUnit, Mockito

Backend & DB: Spring Boot, PostgreSQL, REST APIs, JWT, OAuth 2.0

Tools & DevOps: Android Studio, VS Code, Firebase, Git, GitHub, Postman, Gradle, CI/CD, Agile, Scrum

ACHIEVEMENTS

- Finalist at **Hacknovate 6.0** (ABESIT); engineered a **cross-platform Flutter** app with **Firebase Realtime Database**, **BLoC** state management, and **REST API** integration under a **36-hour** sprint.
- Top finish at **ABES Hackathon 2024** with an **8-feature Flutter & Kotlin** app using **Jetpack Compose** and **Firebase**.
