Education

Ajay Kumar Garg Engineering College — Aug 2024 – May 2028
B.Tech in Computer Science and Engineering | CGPA: 8.06 — Ghaziabad, Uttar Pradesh

Experience

Software Incubator, Software Development Center — Jun 2026 – Aug 2026
Mobile Developer Intern — Ghaziabad, Uttar Pradesh

- Developed **VEMS**, a vehicle entry management app, in **Flutter** and **Dart** with role-based access, **OTP** login, **OCR** document scanning, number plate recognition (**Google ML Kit**) and QR entry/exit logging. ▶ Play Store
- Managed state with **BLoC** and navigation with **GoRouter**; automated builds and releases using **GitHub Actions CI/CD**, **Shorebird** OTA patches and staged **Play Store** rollouts.
- Fixed **12+ production bugs** using **Logcat** and regression testing in an **Agile/Scrum** team of 8.

Programming Club, Ajay Kumar Garg Engineering College — Sep 2025 – Present
Android Developer — Ghaziabad, Uttar Pradesh

- Taught **Android SDK** and **Jetpack Compose** to **160+ students**; reviewed code for **MVVM**, **Git** workflow and **unit testing** standards.
- Delivered an event registration app handling **1,200+ registrations** through **REST APIs**, with **Riverpod** state management, form validation and role checks.

Projects

VitalUp GitHub | *Flutter, Dart, BLoC, Isar DB, Supabase, Google ML Kit* — Jul 2026

- Designed an offline-first health app with **Clean Architecture**; **Isar DB** gives sub-15ms local queries and syncs to **Supabase PostgreSQL** with **Row Level Security**.
- Integrated **Gemini Flash** for meal image analysis with automatic fallback to **Groq Llama Vision**; shipped **Android home widgets** and **BLE** heart rate monitor support.
- Wrote **370+ unit and widget test cases** reaching **82%+ code coverage** across 24 modular feature packages while keeping rendering stable at 60 FPS.

Presently ▶ Play Store | *Kotlin, Jetpack Compose, MVVM, Hilt, Room, WorkManager, FCM* — Mar 2026

- Released an **Android** attendance app on Google Play with **1,500+ installs**, **1000+ DAU** and a **5.0** rating, using **Clean Architecture**, **MVVM** and **Hilt** for **dependency injection**.
- Converted Figma designs into **20+ Jetpack Compose** screens; implemented **Glance** widgets, an attendance predictor, **WorkManager** background sync for timetable and attendance, and **FCM** push notifications.
- Cut cold start time by **40%** using **Coroutines**, **Flow** and offline-first **Room** caching; kept the crash rate at **0.02%** through staged rollouts.

BunkBite ▶ Play Store | *Flutter, Dart, PostgreSQL, WebSocket, FCM, Dio* — Feb 2026

- Launched a multi-tenant canteen ordering app on Google Play with menu browsing, cart customization and secure payments, using **BLoC** for state management and **GoRouter** for navigation.
- Enabled live order tracking over **WebSocket** and **FCM** push alerts, with **Dio** handling API networking.
- Wrote widget and unit tests that reached **65%+ test coverage** across the BLoC state logic and core ordering screens.

Technical Skills

Languages: Kotlin, Java, Dart, SQL
Android: Android SDK, Jetpack Compose, Material Design, MVVM, Clean Architecture, Hilt (Dependency Injection), Room (SQLite), WorkManager, Retrofit, Coroutines, Flow, Glance
Flutter: Flutter SDK, BLoC, Riverpod, Isar, Dio, GoRouter, Shorebird
Backend & APIs: Firebase (FCM, Realtime Database), Supabase (PostgreSQL), REST APIs, JSON, WebSockets
Tools: Git, GitHub, GitHub Actions, CI/CD, Android Studio, Gradle, Google Play Console, Logcat, Agile/Scrum
Testing & CS: Unit Testing, Widget Testing, Debugging, OOP, Data Structures & Algorithms

Achievements

- **Finalist, Hacknovate 6.0** (ABESIT, 2025) — developed a **Flutter** app with **Firebase Realtime Database** and **REST APIs** in 36 hours.
- **Top 3, ABES Hackathon 2024** — created a **Kotlin** app with 8 core modules using **Jetpack Compose** and **Firebase**.
