Education

Ajay Kumar Garg Engineering College

B.Tech in Computer Science and Engineering, Expected Graduation: May 2028 | CGPA: 8.06

Aug 2024 – May 2028

Ghaziabad, Uttar Pradesh

Experience

Software Incubator, Software Development Center

Mobile Developer Intern

June 2026 – Aug 2026

Ghaziabad, Uttar Pradesh

- Built **VEMS** (Vehicle Entry Management System) in **Flutter SDK** and **Dart** — a **role-based access control** app with **OTP authentication**, **OCR document scanning**, and **number plate recognition** via **Google ML Kit**, and a **QR scanner** for entry/exit logging. ▶ Play Store
- Architected **VEMS** using **BLoC** for state management and **GoRouter** for navigation; configured a **CI/CD pipeline** via **GitHub Actions** and **Shorebird** to automate APK signing, OTA patches, and **Play Store** staged rollouts.
- Debugged and resolved **12+ production issues** via **Logcat** and regression testing; participated in **code reviews** and sprint ceremonies in an **Agile/Scrum** team of 8.

Programming Club, Ajay Kumar Garg Engineering College

Android Developer

Sep 2025 – Present

Ghaziabad, Uttar Pradesh

- Led **Android SDK** and **Jetpack Compose** workshops for **160+ students**; conducted **code reviews**, enforced **MVVM** architecture, **Git** version control, and **unit testing** standards across contributor PRs.
- Launched an event registration system in **Flutter** with **Riverpod** state management and **GoRouter**, processing **1,200+ signups** via **REST API** with real-time form validation and role-based access control.

Projects

Presently ▶ | Kotlin, Jetpack Compose, Android SDK, MVVM, Retrofit, Room, FCM, Coroutines

Mar 2026

- Architected and delivered an **Android** attendance app with **1,000+ DAU**, targeting **4,000+ students**; led system design, development, and **Google Play Store** release end-to-end.
- Added **Glance** home-screen widgets for attendance summaries and a timetable reference module; translated **Figma** designs into **20+ screens** with **Jetpack Compose** and **MVVM**.
- Integrated **FCM** push notifications with department- and year-wise targeting; cut app load time by **40%** with **Kotlin Coroutines** and implemented offline-first storage using **Room**.
- Managed **staged rollouts** on **Google Play Console**; tracked crash reports and **Gradle** build metrics to keep each release stable.

BunkBite ▶ | Flutter SDK, Dart, BLoC, PostgreSQL, WebSocket, FCM

Feb 2026

- Published a **cross-platform** canteen ordering app on **Google Play Store** in **Flutter SDK**, covering menu browsing, order customization, and payment handling via **REST APIs**.
- Implemented real-time order tracking with **FCM** push notifications and **WebSocket** for live status updates.
- Enforced clean architecture with **BLoC**, **Dio**, and **GoRouter**; reached **60%+ test coverage** with widget and unit tests.

TruXpense 🔗 | Kotlin, Jetpack Compose, MVVM, Clean Architecture, Hilt, Room, Retrofit, ML Kit

Jan 2026

- Built an Android expense tracker with **SMS parsing** across 15+ Indian banks and **UPI deep-link integration** with GPay, PhonePe, and Paytm using **Clean Architecture**, **Hilt**, and **Retrofit**.
- Trained a **BERT** model with on-device **ML Kit** for merchant name extraction; achieved **89% accuracy** and cut miscategorization by **35%** against a rule-based baseline.
- Secured **REST APIs** with **JWT** and **OAuth 2.0**; added multi-format export (PDF, Excel) and **WorkManager**-driven budget alerts.
- Reduced average API response time by **30%** with **Kotlin Coroutines** and **Hilt** dependency injection.

Technical Skills

Languages: Kotlin, Java, Dart, JavaScript

Android: Android SDK, Jetpack Compose, MVVM, Clean Architecture, Hilt, Room, WorkManager, Retrofit, Kotlin Coroutines, ML Kit, Glance, Material Design, Gradle

Flutter: Flutter SDK, BLoC, Riverpod, Dio, GoRouter, Shorebird, FCM, Widget Testing

Tools: Android Studio, Firebase, Google Play Console, Git, Version Control, GitHub Actions, Logcat

Practices: CI/CD, Agile, Scrum, Version Control, Unit Testing, Widget Testing

Achievements

- **Finalist, Hacknovate 6.0** (ABESIT, 2025) — shipped a **Flutter** app with **Firebase Realtime Database**, **BLoC**, and **REST API** in 36 hours.
- **Top 3, ABES Hackathon 2024** — delivered a **Kotlin** Android app with 8 features using **Jetpack Compose** and **Firebase**.
